EDUCATION

GRADUATION

Sri Shakthi Institute of Engineering and Technology
Artificial Intelligence & Machine Learning
Coimbatore ,Tamil Nadu

UNDERGRADUATION

Santiniketan Public School
Theni, Tamil Nadu

SKILLS

- Python
- C
- TypeScript
- Javascript
- React.JS
- FastAPI
- Express.JS
- Mongo DB
- SQL
- Agentic AI
- LLMs
- Deep Learning
- REST APIs
- NLP
- Flutter
- Github
- Machine Learning

AWARDS & CERTIFICATES

UDEMY | [AGENTIC AI](#)

INFOSYS | [Intro to Data Science](#)

INFOSYS | [Introduction to NLP](#)

EXPERIENCE

Freelance | AI & Web
Development Engineer

PROJECTS

AI Desktop Assistant | Mar 2026 - Mar 2026 | [Live Link](#) | [Github Link](#)

- Developed an AI-powered Desktop Assistant using Agentic AI and Large Language Models (LLMs) to automate daily tasks through intelligent voice and chat-based interaction.
- Implemented features such as Google search, YouTube access, Chrome automation, application launching, and real-time conversational assistance using Natural Language Processing and speech recognition.
- Designed the system to provide a smooth hands-free user experience focused on productivity, automation, and smart task execution.
Tech: Python, FastAPI, React.js, Speech Recognition, LLMs, Agentic AI, JavaScript, Github

Brain Tumor Detector | Jan 2026 - Feb 2026 | [Github Link](#)

- Developed a Deep Learning-based Brain Tumor Detection System capable of analyzing MRI scan images and predicting tumor presence with high accuracy.
- Implemented Convolutional Neural Networks (CNNs) and image processing techniques for medical image classification and prediction.
- Added downloadable medical reports with detailed prediction explanations and result visualization for enhanced usability.
Tech: Python, TensorFlow, Keras, CNN, OpenCV, Flask/FastAPI, React.js, Agentic AI, Github

Notogen-AI Notes Creator | Jan 2026 - Feb 2026 | [Github Link](#)

- Created an AI-powered Flutter application that automatically generates structured study notes by comparing teacher notes with classroom speech/transcripts.
- Integrated Agentic AI and LLMs for intelligent summarization, content understanding, and automated PDF note generation.
- Designed a responsive mobile interface focused on improving learning efficiency and student productivity.
Tech: Flutter, Firebase, Dart, Python, LLMs, NLP, Agentic AI, GitHub

AI- Email Automator | Oct 2025 - Oct 2025 | Terminal Based | [Github Link](#)

- Built an intelligent Email Automation System capable of reading, classifying, and generating automated replies for emails using AI-powered workflows.
- Implemented NLP and LLM-based classification to categorize emails such as work, spam, important, and personal messages.
- Automated context-aware email response generation to improve productivity and streamline communication workflows.
Tech: Python, NLP, LLMs, Email APIs, Agentic AI, Github,Gmail-API Integration

AI Expense Tracker | In Progress | [Live Link](#) | [Github Link](#)

- Developed a responsive expense management web application to track daily income and expenses, categorize transactions, and monitor spending habits through an intuitive dashboard.
- Implemented features such as expense and income recording, category-wise analytics, budget tracking, transaction history management, dark/light mode support, and real-time financial insights with interactive charts and visualizations.
- Designed a modern, mobile-friendly user interface focused on usability, helping users manage personal finances efficiently and make data-driven budgeting decisions.
Tech: React.js,TypeScript,FastAPI,Python,MongoDB,REST APIs,AgenticAI,LLMs
